

UNISHA CHAULAGAIN

AI Agent Developer · Python Engineer · ML Enthusiast

📍 Kathmandu, Nepal 📞 +977-9865338866 ✉️ yunishachaulagain001@gmail.com

🌐 linkedin.com/in/unisha-chaulagain 🐙 github.com/Unisha0 🌐 unishachaulagain.com.np

CAREER OBJECTIVE

Skilled in Python, RAG systems, LLM fine-tuning & NLP. Experienced in building AI agent workflows, tool-calling pipelines & structured JSON outputs. Passionate about developing cutting-edge AI products in collaborative, fast-paced environments.

EDUCATION

Bachelor of Engineering — Computer Engineering

Himalaya College of Engineering, Kathmandu 2022 – 2026 (*Awaiting Results*)

- Relevant coursework: Machine Learning, NLP, Data Structures, Algorithms, Database Systems, Software Engineering
- Built 10+ AI/ML and full-stack projects across NLP, RAG systems, deep learning, and web development
- Multiple online certifications in Python, AI/ML, and web development

WORK EXPERIENCE

Associate Full Stack Developer

Trend Crafters Global, Kathmandu Jan 2025 – Apr 2026

- Built and maintained full-stack web applications using Python, Django, HTML, CSS, and JavaScript
- Developed and integrated REST APIs with structured JSON outputs, validation, and error handling
- Managed codebase and collaborative delivery via GitHub — pull requests, branching, and version control
- Debugged, tested, and improved application performance and reliability independently
- Handled client requirements, project timelines, and end-to-end feature delivery

PROJECTS

Fine-tuned GPT-2 + RAG System | Python · HuggingFace · FAISS · GPT-2 · RAG

- Built a complete Retrieval-Augmented Generation (RAG) pipeline combining fine-tuned GPT-2 with vector-based document retrieval — a direct AI agent tool-calling prototype.
- Implemented document ingestion, chunking, embedding, and retrieval with structured JSON output and validation.
- Applied to Nepali startup and business Q&A domain — demonstrates LLM fine-tuning and agentic workflow skills.

GitHub: <https://github.com/Unisha0/Fine-tuned-GPT-2-RAG->

Civic Complaint Classification System — CivicConnect (Major Project) | Python · DistilBERT · NLP · Django · REST API

- Fine-tuned DistilBERT for multilingual (English + Nepali) complaint classification with high accuracy.
- Built complete NLP pipeline: data preprocessing, model training, evaluation, and Django REST API deployment.
- Implemented structured JSON output with guardrails to route complaints to correct government departments.
- End-to-end project covering the full ML lifecycle from raw data to production-ready API.

GitHub: <https://github.com/Unisha0/CIVICCOMPLAINT>

Smart Health Emergency Assistance (Minor Project) | Firebase · JavaScript · CSS · Haversine Algorithm

- Real-time web platform connecting patients, ambulances, and hospitals with live Firebase location tracking.
- Implemented optimal ambulance routing using the Haversine formula for nearest-hospital matching.

- Built with structured real-time data flow, timeout handling, and status validation across user roles.

GitHub: <https://github.com/Unisha0/Smart-Health>

AI Training — 10 Projects Collection | *Python · TensorFlow · PyTorch · scikit-learn · NLP · Deep Learning*

- 10 complete end-to-end AI/ML projects covering classification, regression, NLP, generative models, and deep learning.
- Each project includes full pipeline: data collection, preprocessing, model building, evaluation, and structured result logging.
- Demonstrates breadth across supervised learning, neural networks, text processing, and model evaluation.

GitHub: https://github.com/Unisha0/AI_training_with_10_projects

Tour Booking System | *Django · Python · HTML · CSS · JavaScript · PostgreSQL*

- Full-stack Django web application with user authentication, tour booking, payment simulation, and admin panel.
- REST API integration with structured JSON responses, database management, and role-based access control.

GitHub: <https://github.com/Unisha0/tour-booking-system->

Personal Portfolio Website | *TypeScript · Next.js · TailwindCSS*

- Professional portfolio built with TypeScript and Next.js showcasing all AI/ML and full-stack projects.
- Live at: unishachaulagain.com.np

GitHub: <https://github.com/Unisha0/portfolio>

TECHNICAL SKILLS

AI / ML	Python · TensorFlow · PyTorch · scikit-learn · HuggingFace · DistilBERT · GPT-2 Fine-tuning · RAG Systems · LangChain · NLP · LLMs
Backend	Django · FastAPI · Flask · REST APIs · JSON Schema · SQLAlchemy
Frontend	HTML5 · CSS3 · JavaScript · TypeScript · React · Next.js · TailwindCSS
Databases	PostgreSQL · MySQL · MongoDB · Firebase
Tools	Git · GitHub · VS Code · Jupyter Notebook · Google Colab · CLI tools
Languages	Python · JavaScript · TypeScript · SQL

CERTIFICATIONS & ACHIEVEMENTS

- Multiple online certifications in Python, Machine Learning, NLP, and Web Development — see LinkedIn
- Built and deployed TrendCraftersGlobal.com — a complete freelance business website from scratch
- Active GitHub portfolio: github.com/Unisha0 with 6+ complete AI/ML and full-stack projects
- Portfolio live at unishachaulagain.com.np — built with TypeScript and Next.js

SOFT SKILLS

- Strong debugging mindset — experienced in tracing, fixing, and documenting complex technical issues
- Comfortable with CLI tools, clean code structure, and structured JSON/API output design
- Self-disciplined and reliable in remote/WFH environments — able to meet deadlines independently
- Clear written communication for progress reporting, documentation, and GitHub PR descriptions
- Fast learner — quickly adopts new frameworks, tools, and workflows (LangChain, FAISS, FastAPI)
